# Copper Creek Warranty

---

## Mechanical Warranty

- Copper Creek Hardware Inc. (CCH) offers a mechanical warranty for all CCH residential hardware that covers mechanical defects in material and workmanship. The warranty does not cover misuse, abuse, finish defects, damage caused by poor installation or failure to read installation instructions. CCH will not be held liable for any and all indirect or incidental costs, punitive or consequential damages, arising from the sale, abuse, or misuse of CCH locksets. All warranties are for the original purchaser from the date of purchase as long as the original user occupies that residence. CCH locksets carry a lifetime mechanical warranty to the original purchaser of the locksets only.

## Finish Warranty

- CCH offers a finish warranty for all residential hardware that covers finish blemishes and imperfections due to manufacturing process. The warranty also covers tarnish caused by natural environmental elements if and only proper care & maintenance instructions are followed (see proper care instructions below). The warranty does not cover damages from paints, cleaners, chemicals, scratches, abrasions, or installation in non-residential buildings and applications.
- All warranties are to the original purchaser from the date of purchase so long as the original user occupies that residence. Warranty replacement may be limited to a "one time replacement" if environmental conditions are considered severe (e.g., living within a few miles from the ocean) at the discretion of CCH. All CCH locksets carry a five (5) year warranty on standard finishes, Montana Forge Handlesets carry a ten (10) year warranty on French Gold, Polished Stainless and Satin Stainless finishes, and five (5) year warranty on Black and Tuscan Bronze finishes.

## Proper Care & Finish Maintenance

- For all exterior applications, once installation of your CCH lockset is complete, take a few minutes and protect your lockset with a quality carnauba car wax following the manufacturer's application and buffing instructions. Lockset should be cleaned once per month with a damp cloth. Excessive grime can be removed with a gentle soap but do not, under any circumstances, use any harsh or abrasive chemical cleaner. Failure to follow these instructions will void the finish warranty.
